TNT

www.tntwrecker.com

Across town, across Texas, or anywhere in the Southwest, TNT can transport virtually any piece of equipment – even if it's not in working order. We specialize in delivering to construction and busy industrial locations. With on-time arrivals!

TNT was the carrier of choice to deliver this new fire engine to Labelle. Many companies find it's more economical to have TNT move equipment than to do it themselves. You save on manpower, liability and wear and tear.

When you need a piece of equipment delivered to a job site, call TNT. With our diversified fleet of towing and transport equipment dispatched from five locations, we can respond reliably at any time, even on the weekends. (left)

Need to move a treasured antique? Have a run-of-the-mill breakdown? We handle every car with the same attention to safety and the same dedication to damage-free delivery. (right)

What does “professional operation” mean to you when you need assistance?

- our trained dispatchers know what questions to ask to send out the right piece of equipment – the first time.
- you will never get an answering machine.
- all our equipment is maintained in operating condition for immediate service.
- our record of service going back to 1994 speaks for itself: our goal is customer retention through excellent service.

Wherever it has to go, regardless of the operating condition, TNT drivers can hook up and tow 24 hours a day. We cross-train our drivers so a competent operator is always available for a wide range of service 7 days a week, all year long.

We take pride in updating our fleet regularly and running the best equipment available. Drivers choose and stay with TNT longer, increasing our experience bank every day.

Our medium duty tow trucks are the most versatile trucks in our fleet, capable of towing a wide range of trucks.

When emergency equipment is required, TNT will dispatch a special trailer with everything needed for recovery. Shown above: air cushions uprighting a trailer safely and without further damage. TNT's skid-steer loader and portable ramp handle off-loading, transfers of loads, and time-sensitive emergencies such as refrigerated cargo.
